Myc-Tag Rabbit Monoclonal Antibody

CABE070

Product Information

Product SKU:	CABE070	**Gene ID**:	-	**Size**:	20uL, 100uL
Clone No:	ARC5004-12	**Host Species:**	Rabbit	**Reactivity**:	Species independent

Additional Information

Observed MW:	58kDa(NLK)/72kDa(YAP1)/55kDa (PTEN)	**Conjugate:**	Unconjugated
Calculated MW:	-	**Isotype:**	IgG

Immunogen Information

Background:	Protein tags are peptide sequences genetically grafted onto a recombinant protein. Often these tags are removable by chemical agents or by enzymatic means, such as proteolysis or intein splicing. Tags are attached to proteins for various purposes.Epitope tags are short peptide sequences which are chosen because high-affinity antibodies can be reliably produced in many different species. These are usually derived from viral genes, which explain their high immunoreactivity. Epitope tags include V5-tag, Myc-tag, HA-tag and NE-tag. These tags are particularly useful for western blotting, immunofluorescence and immunoprecipitation experiments, although they also find use in antibody purification.
Recommended Dilution:	WB,1:10000 - 1:140000 IF/ICC,1:50 - 1:200 IP,0.5μg-4μg antibody for 200μg-400μg extracts of whole cells
Synonyms:	Myc; Myc tag; Myc-tag; Myc-Tag
Purifcation Method:	Affinity purification
Immunogen:	A synthetic peptide corresponding to Myc tag.
Storage:	Store at -20℃. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,0.05% BSA,50% glycerol,pH7.3.
