Phospho-MAP2K4-S80 Rabbit Polyclonal Antibody

CABP0067

Product Information	Protein Background		
Size: 20uL, 50uL, 100uL, 200uL Observed MW:	This gene encodes a member of the mitogen-activated protein kinase (MAPK) family. Members of this family act as an integration point for multiple biochemical signals and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. They form a three-tiered signaling module composed of MAPKKKs, MAPKKs and MAPKs. This protein is phosphorylated at serine and threonine residues by MAPKKKs and		
		44kDa	subsequently phosphorylates downstream MAPK targets at threonine and tyrosine residues. A similar protein in mouse has been reported to play a role in liver organogenesis. A pseudogene
		Calculated MW:	of this gene is located on the long arm of chromosome X. Alternative splicing results in multiple transcript variants.
44kDa/45kDa Applications:	Immunogen information		
		WB IHC	Gene ID: 6416
Reactivity:	0+10		
Human, Mouse, Rat	Uniprot P45985		
Antibody Information	Synonyms: MAP2K4; JNKK; JNKK1; MAPKK4; MEK4; MKK4; PRKMK4; SAPKK-1;		
Recommended dilutions: WB 1:500 - 1:2000 IHC 1:50 - 1:200	SAPKK1; SEK1; SERK1; SKK1		
Source: Rabbit	Immunogen: A synthetic phosphorylated peptide around S80 of human MAP2K4 (NP_003001.1).		
lsotype: lgG	Storage: Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.		

Purification: Affinity purification

Western blot analysis of extracts of NIH/3T3 and C6 cells, using Phospho-MAP2K4-S80 antibody (CABP0067) at 1:1000 dilution. NIH/3T3 cells were treated by PDGF (100ng/mL) for 30 minutes after serum-starvation overnight or treated by PDGF (50 ng/mL) for 30 minutes after serumstarvation overnight. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% BSA. Detection: ECL Enhanced Kit (CABM00021). Exposure time: 150s.
