

Phospho-MET-Y1235 Rabbit Polyclonal Antibody

CABP0079

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

Refer to Figures

Calculated MW:

85kDa/155kDa/157kDa

Applications:

WB IF

Reactivity:

Human

Protein Background

This gene encodes a member of the receptor tyrosine kinase family of proteins and the product of the proto-oncogene MET. The encoded preprotein is proteolytically processed to generate alpha and beta subunits that are linked via disulfide bonds to form the mature receptor. Further processing of the beta subunit results in the formation of the M10 peptide, which has been shown to reduce lung fibrosis. Binding of its ligand, hepatocyte growth factor, induces dimerization and activation of the receptor, which plays a role in cellular survival, embryogenesis, and cellular migration and invasion. Mutations in this gene are associated with papillary renal cell carcinoma, hepatocellular carcinoma, and various head and neck cancers. Amplification and overexpression of this gene are also associated with multiple human cancers.

Immunogen information

Gene ID:

4233

Uniprot

P08581

Antibody Information

Recommended dilutions:

WB 1:500 - 1:2000 IF 1:20 - 1:100

Source:

Rabbit

Synonyms:

MET; AUTS9; DFNB97; HGFR; RCCP2; c-Met

Immunogen:

A synthetic phosphorylated peptide around Y1235 of human MET (NP_000236.2).

Isotype:

IgG

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Purification:

Affinity purification

Product Images

Immunofluorescence analysis of U2OS cells using Phospho-MET-Y1235 antibody (CABP0079). Blue: DAPI for nuclear staining.
