AssayGenie

CABP0090

Product Information

Product SKU:	CABP0090	Gene ID:	8243	Size:	20uL, 100uL		
Clone No:	-	Host Species:	Rabbit	Reactivity :	Human, Mouse, Rat		
Additional Information							

Observed MW:	160kDa	Conjugate:	Unconjugated
Calculated MW:	143kDa	lsotype:	lgG

Immunogen Information

Background	Proper cohesion of sister chromatids is a prerequisite for the correct segregation of chromosomes
	during cell division. The cohesin multiprotein complex is required for sister chromatid cohesion. This
	complex is composed partly of two structural maintenance of chromosomes (SMC) proteins, SMC3 and
	either SMC1B or the protein encoded by this gene. Most of the cohesin complexes dissociate from the
	chromosomes before mitosis, although those complexes at the kinetochore remain. Therefore, the
	encoded protein is thought to be an important part of functional kinetochores. In addition, this protein
	interacts with BRCA1 and is phosphorylated by ATM, indicating a potential role for this protein in DNA
	repair. This gene, which belongs to the SMC gene family, is located in an area of the X-chromosome
	that escapes X inactivation. Mutations in this gene result in Cornelia de Lange syndrome. Alternative
	splicing results in multiple transcript variants encoding different isoforms.
Recommended Dilution:	WB,1:500 - 1:2000 IHC-P,1:50 - 1:200 IP,0.5µg-4µg antibody for 200µg-400µg extracts of whole cells
Synonyms:	SMC1; SMCB; CDLS2; DEE85; SB1.8; EIEE85; SMC1L1; DXS423E; SMC1alpha; Phospho-SMC1-S957
Purifcation Method:	Affinity purification
Immunogen:	A synthetic phosphorylated peptide around S957 of human SMC1A (NP_006297.2).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
