## Phospho-Bcl-2-T56 Rabbit Polyclonal Antibody

## CABP0316

Product Information Size:	<b>Protein Background</b> This gene encodes an integral outer mitochondrial membrane protein that blocks the apoptotic death of some cells such as lymphocytes. Constitutive expression of BCL2, such as in the case of translocation of BCL2 to Ig heavy chain locus, is thought to be the cause of follicula lymphoma. Alternative splicing results in multiple transcript variants.
