CABP0369

Product Information	Protein Background	
Size: 50uL, 100uL, 200uL Observed MW:	The protein encoded by this gene phosphorylates the inhibitor in the inhibitor/NF-kappa- complex, causing dissociation of the inhibitor and activation of NF-kappa-B. The encode protein itself is found in a complex of proteins. Several transcript variants, some protein-coding and some not, have been found for this gene.
