# Phospho-JNK1/2-T183/Y185 Rabbit Polyclonal Antibody

**CABP0473** 

#### Product Information Size:

20uL, 50uL, 100uL, 200uL

## **Observed MW:**

54kDa

Calculated MW:

35kDa/44kDa/48kDa/27kDa

**Applications:** 

**Reactivity:** 

Human, Mouse, Rat

WB

## **Protein Background**

The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase is activated by various cell stimuli, and targets specific transcription factors, and thus mediates immediate-early gene expression in response to cell stimuli. The activation of this kinase by tumor-necrosis factor alpha (TNF-alpha) is found to be required for TNF-alpha induced apoptosis. This kinase is also involved in UV radiation induced apoptosis, which is thought to be related to cytochrom c-mediated cell death pathway. Studies of the mouse counterpart of this gene suggested that this kinase play a key role in T cell proliferation, apoptosis and differentiation. Several alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq, Apr 2016]

# Immunogen information

Gene ID:

5599/5601

**Uniprot** P45983/P45984

# **Antibody Information**

#### Recommended dilutions: WB 1:500 - 1:2000

Source: Rabbit

## Immunogen:

Synonyms:

JNK1/2

A synthetic phosphorylated peptide around T183 of human JNK1 (NP\_620637.1).

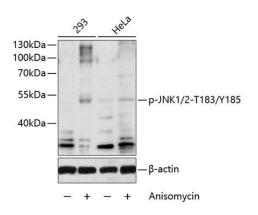

**Isotype:** IgG

## Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

## **Purification:** Affinity purification

# **Product Images**

Western blot analysis of extracts of various cell lines, using Phospho-JNK1/2-T183/Y185 antibody (CABP0473) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% BSA.
