

Phospho-NAK/TBK1-S172 Rabbit Monoclonal Antibody

CABP1026

Product Information

Size:

20uL, 50uL, 100uL

Observed MW:

84kDa

Calculated MW:

84kDa

Applications:

WB

Reactivity:

Human, Mouse

Protein Background

The NF-kappa-B (NFKB) complex of proteins is inhibited by I-kappa-B (IKB) proteins, which inactivate NFKB by trapping it in the cytoplasm. Phosphorylation of serine residues on the IKB proteins by IKB kinases marks them for destruction via the ubiquitination pathway, thereby allowing activation and nuclear translocation of the NFKB complex. The protein encoded by this gene is similar to IKB kinases and can mediate NFKB activation in response to certain growth factors. [provided by RefSeq, Oct 2010]

Immunogen information

Gene ID:

29110

Uniprot

Q9UHD2

Synonyms:

FTDALS4; NAK; T2K

Antibody Information

Recommended dilutions:

WB 1:500 - 1:2000

Source:

Rabbit

Isotype:

IgG

Purification:

Affinity purification

Immunogen:

A phospho specific peptide corresponding to residues surrounding S172 of human NAK/TBK1

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 0.05% BSA, 50% glycerol, pH7.3.
