

H3N2 Influenza-A Antibody

CPAB0389

Product Information

Size:

10µg

Applications:

Western Blot, ELISA

Reactivity:

Viral

Source:

Mouse

Isotype:

IgG1

Purification Method:

Protein-A column.

Protein Background:

H3N2 is a subtype of the influenza A virus. Its name derives from the forms of the two kinds of protein on the surface of its coat, hemagglutinin(H) and neuraminidase(N). H3N2 exchanges genes for internal proteins with other influenza subtypes. H3N2 has tended to dominate in prevalence over H1N1, H1N2, and influenza B. H3N2 strain descended from H2N2 by antigenic shift, in which genes from multiple subtypes re-assorted to form a new virus. Both the H2N2 and H3N2 strains contained genes from avian influenza viruses.

Synonyms:**Immunogen:**

Influenza A hemagglutinin H3N2.

Storage:

Should be stored at 4C. Do not freeze.
