

Anti-Human CD307e (FcRL5) In Vivo Antibody - Ultra Low Endotoxin

Product Information

Product SKU:

IVMB0375

Size:

1mg, 5mg, 25mg, 50mg, 100mg

Concentration:

> 5.0 mg/ml

Isotype:

IgG2a k

Host:

Mouse

Clone:

509F6

Category:

Monoclonal Antibody

Reactivity:

Human

Synonyms:

CD307e, CD307, BXMAS1, FCRH5, Fc receptor-like protein 5, IRTA2

Specificity:

Clone 50946 recognizes human FcRL5 within the first 3 Ig domains. Clone 50946 does not cross-react with FcRL4.

Formulation:

This monoclonal antibody is aseptically packaged and formulated in 0.01 M phosphate buffered saline (150 mM NaCl) PBS pH 7.2 - 7.4 with no carrier protein, potassium, calcium or preservatives added. Due to inherent biochemical properties of antibodies, certain products may

be prone to precipitation over time. Precipitation may be removed by aseptic centrifugation and/or filtration.

Endotoxin Level:

≤ 0.5 EU/mg as determined by the LAL method

Purity:

>98% monomer by analytical SEC · >95% by SDS Page

Immunogen:

Cells transfected with Human FcRL5.

Storage and Stability:

Functional grade preclinical antibodies may be stored sterile as received at 2-8°C for up to one month. For longer term storage, aseptically aliquot in working volumes without diluting and store at -80°C. Avoid Repeated Freeze Thaw Cycles.

Product Preparation:

Functional grade preclinical antibodies are manufactured in an animal free facility using in vitro cell culture techniques and are purified by a multi-step process including the use of protein A or G to assure extremely low levels of endotoxins, leachable protein A or aggregates.

Applications

B, FC, In Vivo, IP

Applications & Recommended Usage:

B, FC, In Vivo, IP
