

Product Information**Size:**

50ul

Protein Background:

Kr^{1/4}ppel-like factor 15 is a protein that in humans is encoded by the KLF15 gene in the Kr^{1/4}ppel-like factor family. KLF15, a kidney-enriched Kr^{1/4}ppel-like factor, is a transcriptional activator that binds the CLCNKA promoter. KLF15, which is a nuclear protein, is expressed primarily in liver, heart, skeletal muscle and kidney tissues but is not detected in lymphoid tissues or bone marrow. It is an important regulator of GLUT4 in both adipose and muscle tissues.

Reactivity:

Human, Mouse

Source:

Rabbit

Gene ID:**Isotype:**

IgG

KLF15

Uniprot**Applications:**

ELISA, IHC

Q9UIH9

Recommended dilutions:

ELISA:1:2000-1:5000, IHC:1:25-1:100

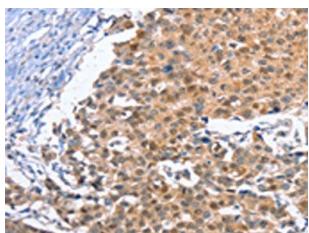

Kruppel-like factor 15

Immunogen:

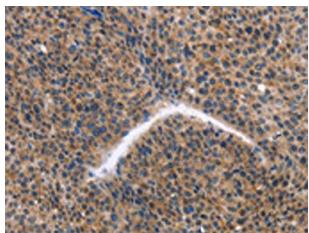

Fusion protein of human KLF15.

Synonyms:-20°C, pH7.4 PBS, 0.05% NaN₃, 40% Glycerol**Storage:**
