RUNX2 Antibody

PACO17655

Product Information

Size:

50ul

Human, Mouse

Reactivity:

Source: Rabbit

Isotype:

lgG

Applications:

ELISA, IHC

Recommended dilutions:

ELISA:1:2000-1:5000, IHC:1:25-1:100

Protein Background:

This gene is a member of the RUNX family of transcription factors and encodes a nuclear protein with an Runt DNA-binding domain. This protein is essential for osteoblastic differentiation and skeletal morphogenesis and acts as a scaffold for nucleic acid, and regulatory factors involved in skeletal gene expression. The protein can bind DNA both as a monomer or, with more affinity, as a subunit of a heterodimeric complex. Mutations in this gene have been associated with the bone development disorder cleidocranial dysplasia (CCD). Transcript variants that encode different protein isoforms result from the use of alternate promoters as well as alternate

splicing.

Gene ID:

RUNX2

Uniprot

Q13950

Synonyms:

runt-related transcription factor 2

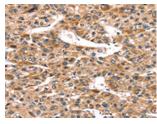

Immunogen:

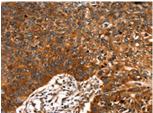

Synthetic peptide of human RUNX2.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol
