RRAD Antibody

PACO18859

Product Information	
Size:	Protein Background:
50ul	Serine/threonine kinase which acts as an essential component of the MAP kinase signal
Reactivity:	transduction pathway. Plays an important role in the cascades of cellular responses evoked by changes in the environment. Mediates signal transduction of TRAF6, various
Human, Mouse, Rat	cytokines including interleukin-1 (IL-1), transforming growth factor-beta (TGFB), TGFB- related factors like BMP2 and BMP4, toll-like receptors (TLR), tumor necrosis factor receptor CD40 and B-cell receptor (BCR). Ceramides are also able to activate MAP3K7/TAK1. Once activated, acts as an upstream activator of the MKK/JNK signal transduction cascade and the p38 MAPK signal transduction cascade through the phosphorylation and activation of several MAP kinase kinases like MAP2K1/MEK1, MAP2K3/MKK3, MAP2K6/MKK6 and MAP2K7/MKK7. These MAP2Ks in turn activate
Source:	
Rabbit	
lsotype:	
IgG	p38 MAPKs, c-jun N-terminal kinases (JNKs) and I-kappa-B kinase complex (IKK). Both
Applications:	p38 MAPK and JNK pathways control the transcription factors activator protein-1 (AP- 1), while nuclear factor-κ B is activated by IKK.
Elisa, IHC	Gene ID:
Recommended dilutions:	RRAD
ELISA:1:1000-1:5000, IHC:1:25-1:100	Uniprot
	P55042
	Synonyms:
	Ras-related associated with diabetes
	Immunogen:
	Synthetic peptide of human RRAD.
	Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human ovarian cancer tissue using PACO18859(RRAD Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using PACO18859(RRAD Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: x—200).
