## Product Information

## Size:

50ul
Reactivity:
Human, Mouse, Rat

## Source:

Rabbit
Isotype:
IgG
Applications:
ELISA, WB, IHC

## Recommended dilutions:

ELISA:1:1000-1:2000, WB:1:200-1:1000,
IHC:1:25-1:100

## Protein Background:

Multi-functional protein which regulates not only caspases and apoptosis, but also modulates inflammatory signaling and immunity, copper homeostasis, mitogenic kinase signaling, cell proliferation, as well as cell invasion and metastasis. Acts as a direct caspase inhibitor. Directly bind to the active site pocket of CASP3 and CASP7 and obstructs substrate entry. Inactivates CASP9 by keeping it in a monomeric, inactive state. Acts as an E3 ubiquitin-protein ligase regulating NF-kappa-B signaling and the target proteins for its E3 ubiquitin-protein ligase activity include: RIPK1, CASP3, CASP7, CASP8, CASP9, MAP3K2/MEKK2, DIABLO/SMAC, AIFM1, CCS and BIRC5/survivin. Ubiquitinion of CCS leads to enhancement of its chaperone activity toward its physiologic target, SOD1, Rather than proteasomal degradation. Ubiquitinion of MAP3K2/MEKK2 and AIFM1 does not lead to proteasomal degradation. Plays a role in copper homeostasis by ubiquitinationg COMMD1 and promoting its proteasomal degradation.

## Gene ID:

LPAR1
Uniprot
Q92633

## Synonyms:

lysophosphatidic acid, receptor 1

## Immunogen:

Synthetic peptide of human LPAR1.

## Storage:

-20\° C, pH7.4 PBS, 0.05\% NaN3, 40\% Glycerol

Gel: 12\%SDS-PAGE, Lysate: 40 \μ g, , Primary antibody: PACO19005(LPAR1 Antibody) at dilution 1/200 dilution, Secondary antibody: Goat anti rabbit $\operatorname{lgG}$ at $1 / 8000$ dilution, Exposure time: 2 minutes.

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using PACO19005(LPAR1 Antibody) at dilution $1 / 20$, on the right is treated with synthetic peptide. (Original magnification: x-200).
