NCR2 Antibody

AssayGenie 🗳

PACO19416

Product Information

Size:

50ul

Reactivity:

Human

Source:

Rabbit

Isotype:

lgG

Applications:

ELISA, IHC

Recommended dilutions:

ELISA:1:1000-1:5000, IHC:1:50-1:200

Protein Background:

Innate immune receptor which acts as a cytoplasmic sensor of viral nucleic acid, and plays a major role in sensing viral infection and in the activation of a cascade of antiviral responses including the induction of type I interferons and proinflammatory cytokines. Its ligands include mRNA lacking 2'-O-methylation at their 5' cap and long-dsRNA (>1 kb in length). Upon ligand binding it associates with mitochondria antiviral signaling protein (MAVS/IPS1) which activates the IKK-related kinases: TBK1 and IKBKE which phosphorylate interferon regulatory factors: IRF3 and IRF7 which in turn activate transcription of antiviral immunological genes, including interferons (IFNs); IFN-alpha and IFN-beta. Responsible for detecting the Picornaviridae family members such as encephalomyocarditis virus (EMCV) and mengo encephalomyocarditis virus (ENMG). Can also detect other viruses such as dengue virus (DENV), west Nile virus (WNV), and reovirus.

Gene ID:

NCR2

Uniprot

095944

Synonyms:

natural cytotoxicity triggering receptor 2

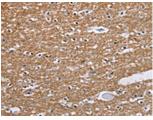

Immunogen:

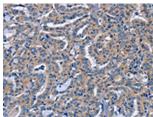

Synthetic peptide of human NCR2.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol
