## **FXR1** Antibody

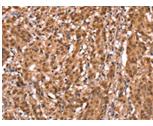

PACO19681

Size:	Protein Background:
50ul	Component of the FACT complex, a general chromatin factor that acts to reorganize nucleosomes. The FACT complex is involved in multiple processes that require DNA as a template such as mRNA elongation, DNA replication and DNA repair. During transcription elongation the FACT complex acts as a histone chaperone that both destabilizes and restores nucleosomal structure. It facilitates the passage of RNA polymerase II and transcription by promoting the dissociation of one histone H2A-H2B dimer from the nucleosome, then subsequently promotes the reestablishment of the nucleosome following the passage of RNA polymerase II. The FACT complex is probably also involved in phosphorylation of 'Ser-392' of p53/TP53 via its association with CK2 (casein kinase II). Binds specifically to double-stranded DNA and at low levels to DNA modified by the antitumor agent cisplatin. May potentiate cisplatin-induced cell death by blocking replication and repair of modified DNA. Also acts as a transcriptional coactivator for p63/TP63.
Reactivity:	
Human, Mouse, Rat	
Source:	
Rabbit	
lsotype:	
lgG	
Applications:	
elisa, wb, ihc	Gene ID:
Recommended dilutions:	FXR1
ELISA:1:1000-1:2000, WB:1:200-1:1000, IHC:1:25-1:100	Uniprot
	P51114
	Synonyms:
	fragile X mental retardation, autosomal homolog 1
	Immunogen:

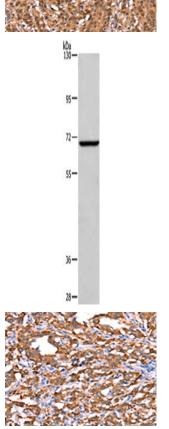

## Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using PACO19681(FXR1 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).

Gel: 6%SDS-PAGE, Lysate: 40 μ g, Lane: 231 cells, Primary antibody: PACO19681(FXR1 Antibody) at dilution 1/300, Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution, Exposure time: 10 minutes.

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO19681(FXR1 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).
