GPR124 Antibody

PACO19729

Product Information	
Size:	Protein Background:
50ul	Methylates (mono- and asymmetric dimethylation) the guanidino nitrogens of arginyl
Reactivity:	residues in several proteins involved in DNA packaging, transcription regulation, pre- mRNA splicing, and mRNA stability. Recruited to promoters upon gene activation
Human, Mouse	together with histone acetyltransferases from EP300/P300 and p160 families, methylates histone H3 at 'Arg-17' (H3R17me), forming mainly asymmetric
Source:	dimethylarginine (H3R17me2a), leading to activate transcription via chromatin
Rabbit	remodeling. During nuclear hormone receptor activation and TCF7L2/TCF4 activation, acts synergically with EP300/P300 and either one of the p160 histone acetyltransferases
lsotype:	NCOA1/SRC1, NCOA2/GRIP1 and NCOA3/ACTR or CTNNB1/beta-catenin to activate transcription. During myogenic transcriptional activation, acts together with
lgG	NCOA3/ACTR as a coactivator for MEF2C. During monocyte inflammatory stimulation,
Applications:	acts together with EP300/P300 as a coactivator for NF-kappa-B. Acts as coactivator for PPARG, promotes adipocyte differentiation and the accumulation of brown fat tissue.
Elisa, ihc	Gene ID:
Recommended dilutions:	ADGRA2
ELISA:1:2000-1:5000, IHC:1:50-1:200	Uniprot
	Q96PE1
	Synonyms:
	G protein-coupled receptor 124
	Immunogen:
	Synthetic peptide of human GPR124.
	Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using PACO19729(GPR124 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO19729(GPR124 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: x—200).
