# **GREB1 Antibody**

### PACO19742

#### **Product Information**

Size:

50ul

Reactivity:

Human, Mouse

Source:

Rabbit

Isotype:

lgG

**Applications:** 

ELISA, IHC

**Recommended dilutions:** 

ELISA:1:2000-1:5000, IHC:1:50-1:200

#### **Protein Background:**

As the sensor component of the NLRP3 inflammasome, plays a crucial role in innate immunity and inflammation. In response to pathogens and other damage-associated signals, initiates the formation of the inflammasome polymeric complex, made of NLRP3, PYCARD and CASP1 (or possibly CASP4/CASP11). Recruitment of proCASP1 to the inflammasome promotes its activation and CASP1-catalyzed IL1B and IL18 maturation and secretion in the extracellular milieu. Activation of NLRP3 inflammasome is also required for HMGB1 secretion. The active cytokines and HMGB1 stimulate inflammatory responses. Inflammasomes can also induce pyroptosis, an inflammatory form of programmed cell death. Under resting conditions, NLRP3 is autoinhibited. NLRP3 activation stimuli include extracellular ATP, reactive oxygen species, K(+) efflux, crystals of monosodium urate or cholesterol, beta-amyloid fibers, environmental or industrial particles and nanoparticles, etc. However, it is unclear what constitutes the direct NLRP3 activator.

Gene ID:

GREB1

Uniprot

Q4ZG55

Synonyms:

growth regulation by estrogen in breast cancer 1

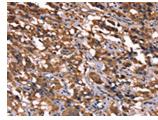

Immunogen:

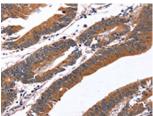

Synthetic peptide of human GREB1.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

## **Product Images**

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO19742(GREB1 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human colon cancer tissue using PACO19742(GREB1 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: x—200).
