# **MARK1 Antibody**

#### **PACO19988**

#### **Product Information**

Size:

50ul

Reactivity:

Human

Source:

Rabbit

Isotype:

lgG

**Applications:** 

ELISA, IHC

Recommended dilutions:

ELISA:1:2000-1:5000, IHC:1:50-1:200

### **Protein Background:**

Transcriptional repressor. Can act with CTBP1 to synergistically repress transcription but CTPBP1 is not essential. Plays an important role in the specification and differentiation of lung epithelium. Acts cooperatively with FOXP4 to regulate lung secretory epithelial cell fate and regeneration by restricting the goblet cell lineage program; the function may involve regulation of AGR2. Essential transcriptional regulator of B-cell development. Involved in regulation of cardiac muscle cell proliferation. Involved in the columnar organization of spinal motor neurons. Promotes the formation of the lateral motor neuron column (LMC) and the preganglionic motor column (PGC) and is required for respective appropriate motor axon projections. The segment-appropriate generation of spinal chord motor columns requires cooperation with other Hox proteins. Can regulate PITX3 promoter activity; may promote midbrain identity in embryonic stem cell-derived dopamine neurons by regulating PITX3.

Gene ID:

MARK1

Uniprot

Q9P0L2

Synonyms:

MAP/microtubule affinity-regulating kinase 1

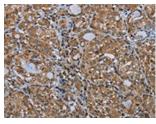

Immunogen:

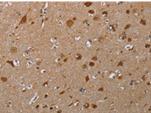

Synthetic peptide of human MARK1.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

## **Product Images**

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO19988(MARK1 Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using PACO19988(MARK1 Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: x—200).
