TRPV1 Antibody

Product Information

PACO20011

Size: Protein Background: Signaling adapter that couples activated growth factor receptors to signaling pathways. Participates in a signaling cascade initiated by activated KIT and KITLG/SCF. Isoform p46Shc and isoform p52Shc, once phosphorylated, couple activated receptor tyrosine kinases to Ras via the recruitment of the GRB2/SOS complex and are implicated in the cytoplasmic propagation of mitogenic signals. Isoform p46Shc and isoform p52Shc Source: may thus function as initiators of the Ras signaling cascade in various non-neuronal systems. Isoform p66Shc does not mediate Ras activation, but is involved in signal transduction pathways that regulate the cellular response to oxidative stress and life

been correlated with life span.

Isotype:

Applications:

ELISA, IHC

lgG

Recommended dilutions:

ELISA:1:1000-1:2000, IHC:1:25-1:100

Gene ID:

TRPV1

Uniprot

Q8NER1

Synonyms:

transient receptor potential cation channel, subfamily V, member 1

span. Isoform p66Shc acts as a downstream target of the tumor suppressor p53 and is

indispensable for the ability of stress-activated p53 to induce elevation of intracellular

oxidants, cytochrome c release and apoptosis. The expression of isoform p66Shc has

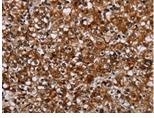

Immunogen:

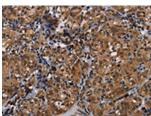

Synthetic peptide of human TRPV1.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Product Images

The image on the left is immunohistochemistry of paraffin-embedded Human prostate cancer tissue using PACO20011(TRPV1 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO20011(TRPV1 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).
