PLXNA3 Antibody

PACO20247

Product Information	
Size:	Protein Background:
50ul	Protein phosphatase that associates with over 200 regulatory proteins to form highly
Reactivity:	specific holoenzymes which dephosphorylate hundreds of biological targets. Protein phosphatase 1 (PP1) is essential for cell division, and participates in the regulation of
Human, Mouse, Rat	glycogen metabolism, muscle contractility and protein synthesis. Involved in regulation of ionic conductances and long-term synaptic plasticity. May play an important role in
Source:	dephosphorylating substrates such as the postsynaptic density-associated Ca(2+)/calmodulin dependent protein kinase II. Component of the PTW/PP1 phosphatase complex, which plays a role in the control of chromatin structure and cell cycle progression during the transition from mitosis into interphase. Regulates NEK2 function in terms of kinase activity and centrosome number and splitting, both in the
Rabbit	
lsotype:	
lgG	presence and absence of radiation-induced DNA damage. Regulator of neural tube and
Applications:	optic fissure closure, and enteric neural crest cell (ENCCs) migration during development.
Elisa, IHC	Gene ID:
Recommended dilutions:	PLXNA3
ELISA:1:2000-1:10000, IHC:1:30-1:150	Uniprot
	P51805
	Synonyms:
	plexin A3
	Immunogen:
	Synthetic peptide of human PLXNA3.
	Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using PACO20247(PLXNA3 Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: x—200).
