# SERPINA11 Antibody

### PACO20444

#### **Product Information**

Size:

50ul

Reactivity:

Human, Mouse, Rat

Source:

Rabbit

Isotype:

lgG

**Applications:** 

ELISA, IHC

**Recommended dilutions:** 

ELISA:1:1000-1:2000, IHC:1:25-1:100

### **Protein Background:**

Receptor tyrosine kinase which binds promiscuously transmembrane ephrin-B family ligands residing on adjacent cells, leading to contact-dependent bidirectional signaling into neighboring cells. The signaling pathway downstream of the receptor is referred to as forward signaling while the signaling pathway downstream of the ephrin ligand is referred to as reverse signaling. Generally has an overlapping and redundant function with EPHB2. Like EPHB2, functions in axon guidance during development regulating for instance the neurons forming the corpus callosum and the anterior commissure, 2 major interhemispheric connections between the temporal lobes of the cerebral cortex. In addition to its role in axon guidance plays also an important redundant role with other ephrin-B receptors in development and maturation of dendritic spines and the formation of excitatory synapses. Controls other aspects of development through regulation of cell migration and positioning.

Gene ID:

SERPINA11

Uniprot

Q86U17

## Synonyms:

serpin peptidase inhibitor, clade A (alpha-1 antiproteinase, antitrypsin), member 11

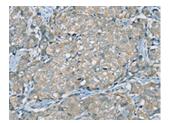

### Immunogen:

Synthetic peptide of human SERPINA11.

### Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol
