## Product Information

Size:
50ul
Reactivity:
Human, Mouse, Rat
Source:
Rabbit
Isotype:
IgG
Applications:
ELISA, IHC
Recommended dilutions:
ELISA:1:2000-1:10000, IHC:1:30-1:150

## Protein Background:

Receptor tyrosine kinase which binds promiscuously membrane-bound ephrin-A family ligands residing on adjacent cells, leading to contact-dependent bidirectional signaling into neighboring cells. The signaling pathway downstream of the receptor is referred to as forward signaling while the signaling pathway downstream of the ephrin ligand is referred to as reverse signaling. Activated by the ligand ephrin-A1/EFNA1 regulates migration, integrin-mediated adhesion, proliferation and differentiation of cells. Regulates cell adhesion and differentiation through DSG1/desmoglein-1 and inhibition of the ERK1/ERK2 (MAPK3/MAPK1, respectively) signaling pathway. May also participate in UV radiation-induced apoptosis and have a ligand-independent stimulatory effect on chemotactic cell migration. During development, may function in distinctive aspects of pattern formation and subsequently in development of several fetal tissues.

Gene ID:
TMSB10
Uniprot
P63313

## Synonyms:

thymosin beta 10

## Immunogen:

Synthetic peptide of human TMSB10.

## Storage:

-20\° C, pH7.4 PBS, 0.05\% NaN3, 40\% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using PACO20643(TMSB10 Antibody) at dilution $1 / 35$, on the right is treated with synthetic peptide. (Original magnification: x-200).

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using PACO20643(TMSB10 Antibody) at dilution $1 / 35$, on the right is treated with synthetic peptide. (Original magnification: x-200).
