SYNCRIP Antibody

PACO20898

Product Information	
Size:	Protein Background:
50ul	Serine/threonine-protein phosphatase that dephosphorylates a myriad of proteins
Reactivity:	involved in different signaling pathways including the kinases CSNK1E, ASK1/MAP3K5, PRKDC and RAF1, the nuclear receptors NR3C1, PPARG, ESR1 and ESR2, SMAD proteins
Human, Mouse, Rat	and TAU/MAPT. Implicated in wide ranging cellular processes, including apoptosis, differentiation, DNA damage response, cell survival, regulation of ion channels or
Source:	circadian rhythms, in response to steroid and thyroid hormones, calcium, fatty acid, ,
Rabbit	TGF-beta as well as oxidative and genotoxic stresses. Participates in the control of DNA damage response mechanisms such as checkpoint activation and DNA damage repair
lsotype:	through, for instance, the regulation ATM/ATR-signaling and dephosphorylation of PRKDC and TP53BP1. Inhibits ASK1/MAP3K5-mediated apoptosis induced by oxidative
lgG	stress. Plays a positive role in adipogenesis, mainly through the dephosphorylation and activation of PPARG transactivation function. Also dephosphorylates and inhibits the anti-adipogenic effect of NR3C1.
Applications:	
Elisa, ihc	Gene ID:
Recommended dilutions:	SYNCRIP
ELISA:1:2000-1:5000, IHC:1:25-1:100	Uniprot
	O60506
	Synonyms:
	synaptotagmin binding, cytoplasmic RNA interacting protein
	Immunogen:
	Synthetic peptide of human SYNCRIP.
	Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using PACO20898(SYNCRIP Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using PACO20898(SYNCRIP Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: x—200).
