

Product Information**Size:**

100ul

Protein Background:

Efficiently joins single-strand breaks in a double-stranded polydeoxynucleotide in an ATP-dependent reaction. Involved in DNA non-homologous end joining (NHEJ)

required for double-strand break repair and V(D)J recombination. The LIG4-XRCC4 complex is responsible for the NHEJ ligation step, and XRCC4 enhances the joining activity of LIG4. Binding of the LIG4-XRCC4 complex to DNA ends is dependent on the assembly of the DNA-dependent protein kinase complex DNA-PK to these DNA ends.

Reactivity:

Human

Source:

Rabbit

Gene ID:**Isotype:**

IgG

LIG4

Uniprot**Applications:**

ELISA, WB

P49917

Recommended dilutions:

ELISA:1:2000-1:10000, WB:1:500-1:3000

DNA ligase 4; EC 6.5.1.1; DNA ligase IV; Polydeoxyribonucleotide synthase [ATP] 4; LIG4

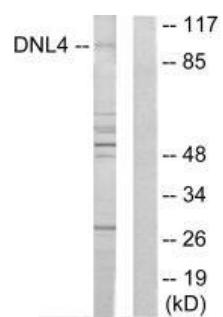

Immunogen:

Synthesized peptide derived from internal of human DNL4.

Storage:

Rabbit IgG in phosphate buffered saline (without Mg²⁺ and Ca²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Product Images

Western blot analysis of extracts from Jurkat cells, using DNL4 antibody.
