FASLG Antibody, Biotin conjugated

PACO26692

Reactivity:

Human

Product Information

Size: Protein Background:

50ug Cytokine that binds to TNFRSF6/FAS, a receptor that transduces the apoptotic signal

into cells. May be involved in cytotoxic T-cell mediated apoptosis and in T-cell development. TNFRSF6/FAS-mediated apoptosis may have a role in the induction of peripheral tolerance, in the antigen-stimulated suicide of mature T-cells, or both.

Binding to the decoy receptor TNFRSF6B/DcR3 modulates its effects.
