Recommended dilutions:

Size: Protein Background:

50ug Receptor-proximal protein kinase regulating integrin-mediated signal transduction.

May act as a mediator of inside-out integrin signaling. Focal adhesion protein part of

the complex ILK-PINCH. This complex is considered to be one of the convergence points of integrin- and growth factor-signaling pathway. Could be implicated in

Human points of integrin- and growth factor-signaling pathway. Could be implicated in mediating cell architecture, adhesion to integrin substrates and anchorage-dependent growth in epithelial cells. Phosphorylates beta-1 and beta-3 integrin subunit on sering

growth in epithelial cells. Phosphorylates beta-1 and beta-3 integrin subunit on serine

Rabbit and threonine residues, but also AKT1 and GSK3B.
