

PACO34318

Product Information

Size:

50ug

Reactivity:

Human immunodeficiency virus type 2 subtype A

Source:

Rabbit

Isotype:

IgG

Applications:

ELISA

Recommended dilutions:

Protein Background:

Plays a role in nuclear translocation of the viral pre-integration complex (PIC), thus is required for the virus to infect non-dividing cells. Targets specific host proteins for degradation by the 26S proteasome. Acts by associating with the cellular CUL4A-DDB1 E3 ligase complex through direct interaction with host VPRPB/DCAF-1. This change in the E3 ligase substrate specificity results in the degradation of host SAMHD1. In turn, SAMHD1 depletion allows viral replication in host myeloid cells by preventing SAMHD1-mediated hydrolysis of intracellular dNTPs necessary for reverse transcription.

Gene ID:

vpx

Uniprot

P18099

Synonyms:

Protein Vpx (Viral protein X) (X ORF protein), vpx

Immunogen:

Recombinant Human immunodeficiency virus type 2 subtype A Protein Vpx protein (1-113AA).

Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
