## **HLA-DMA Antibody, HRP conjugated**

## PACO34475

Reactivity:

Human

## **Product Information**

Size: Protein Background:

50ug Plays a critical role in catalyzing the release of class II-associated invariant chain peptide

(CLIP) from newly synthesized MHC class II molecules and freeing the peptide binding site for acquisition of antigenic peptides. In B-cells, the interaction between HLA-DM

and MHC class II molecules is regulated by HLA-DO.
