## **ULK1 Antibody**

PACO52038

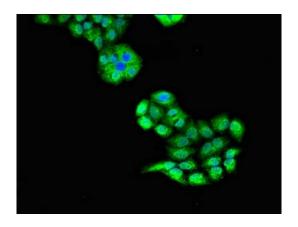

Product Information	
Size:	Protein Background:
50ug	Serine/threonine-protein kinase involved in autophagy in response to starvation. Acts
Reactivity:	upstream of phosphatidylinositol 3-kinase PIK3C3 to regulate the formation of autophagophores, the precursors of autophagosomes. Part of regulatory feedback
Human	loops in autophagy: acts both as a downstream effector and negative regulator of mammalian target of rapamycin complex 1 (mTORC1) via interaction with RPTOR.
Source:	Activated via phosphorylation by AMPK and also acts as a regulator of AMPK by
Rabbit	mediating phosphorylation of AMPK subunits PRKAA1, PRKAB2 and PRKAG1, leading to negatively regulate AMPK activity. May phosphorylate ATG13/KIAA0652 and RPTOR;
lsotype:	however such data need additional evidences. Plays a role early in neuronal differentiation and is required for granule cell axon formation. May also phosphorylate
lgG	SESN2 and SQSTM1 to regulate autophagy.
Applications:	Gene ID:
ELISA, IF	ULK1
Recommended dilutions:	Uniprot
ELISA:1:2000-1:10000, IF:1:50-1:200	O75385
	Synonyms:
	Serine/threonine-protein kinase ULK1 (EC 2.7.11.1) (Autophagy-related protein 1 homolog) (ATG1) (hATG1) (Unc-51-like kinase 1), ULK1, KIAA0722

## Immunogen:

Recombinant Human Serine/threonine-protein kinase ULK1 protein (602-715AA).

## Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, pH 7.4

Immunofluorescent analysis of PC-3 cells using PACO52038 at dilution of 1:100 and Alexa Fluor 488-congugated AffiniPure Goat Anti-Rabbit IgG(H+L).
