# **TCEA3 Antibody**

## PACO59904

Reactivity:

## **Product Information**

Size: Protein Background:

50ug Necessary for efficient RNA polymerase II transcription elongation past templateencoded arresting sites. The arresting sites in DNA have the property of trapping a

certain fraction of elongating RNA polymerases that pass through, resulting in locked

Human ternary complexes. Cleavage of the nascent transcript by S-II allows the resumption of

elongation from the new 3'-terminus.

Source: Gene ID:

Rabbit TCEA3

Isotype: Uniprot

lgG 075764

Applications: Synonyms:

ELISA, IHC, IF

Transcription elongation factor A protein 3 (Transcription elongation factor S-II protein

**Recommended dilutions:**3) (Transcription elongation factor TFIIS. h), TCEA3, TFIISH

ELISA:1:2000-1:10000, IHC:1:500-1:1000, Immunogen:

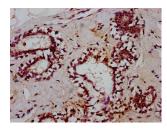

IF:1:200-1:500 Recombinant Human Transcription elongation factor A protein 3 protein (79-169AA).

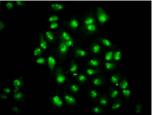

Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, pH 7.4

IHC image of PACO59904 diluted at 1:600 and staining in paraffinembedded human breast cancer performed on a Leica BondTM system. After dewaxing and hydration, antigen retrieval was mediated by high pressure in a citrate buffer (pH 6.0). Section was blocked with 10% normal goat serum 30min at RT. Then primary antibody (1% BSA) was incubated at 4°C overnight. The primary is detected by a biotinylated secondary antibody and visualized using an HRP conjugated SP system.

Immunofluorescence staining of Hela cells with PACO59904 at 1:200, counter-stained with DAPI. The cells were fixed in 4% formaldehyde, permeabilized using 0.2% Triton X-100 and blocked in 10% normal Goat Serum. The cells were then incubated with the antibody overnight at 4°C. The secondary antibody was Alexa Fluor 488-congugated AffiniPure Goat Anti-Rabbit IgG(H+L).
