HIST1H1C (Ab-210) Antibody

PACO60626

Product Information

Size: Protein Background:

50ul Histone H1 protein binds to linker DNA between nucleosomes forming the

Reactivity: macromolecular structure known as the chromatin fiber. Histones H1 are necessary for the condensation of nucleosome chains into higher-order structured fibers. Acts also as

Human a regulator of individual gene transcription through chromatin remodeling, nucleosome

spacing and DNA methylation.

Source: Gene ID:

Rabbit HIST1H1C

Isotype: Uniprot

IgG P16403

Applications: Synonyms:

ELISA, IHC, IF

Histone H1.2 (Histone H1c) (Histone H1s-1), HIST1H1C, H1F2

Recommended dilutions: Immunogen:

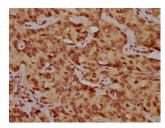

ELISA:1:2000-1:10000, IHC:1:10-1:100, IF:1:10-1:100

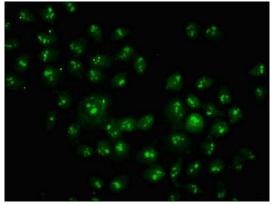

Peptide sequence around site of Lys (210) derived from Human Histone H1.2.

Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, pH 7.4

Product Images

IHC image of PACO60626 diluted at 1:20 and staining in paraffinembedded human liver cancer performed on a Leica BondTM system. After dewaxing and hydration, antigen retrieval was mediated by high pressure in a citrate buffer (pH 6.0). Section was blocked with 10% normal goat serum 30min at RT. Then primary antibody (1% BSA) was incubated at 4°C overnight. The primary is detected by a biotinylated secondary antibody and visualized using an HRP conjugated SP system.

Immunofluorescence staining of Hela cells with PACO60626 at 1:10, counter-stained with DAPI. The cells were fixed in 4% formaldehyde, permeabilized using 0.2% Triton X-100 and blocked in 10% normal Goat Serum. The cells were then incubated with the antibody overnight at 4°C. The secondary antibody was Alexa Fluor 488-congugated AffiniPure Goat Anti-Rabbit IgG(H+L).
