NFE2L2 Antibody, HRP conjugated

PACO64336

Size:	Protein Background:
50ul	Transcription activator that binds to antioxidant response (ARE) elements in the
Reactivity:	promoter regions of target genes. Important for the coordinated up-regulation of genes in response to oxidative stress. May be involved in the transcriptional activation of genes of the beta-globin cluster by mediating enhancer activity of hypersensitive site 2 of the beta-globin locus control region.
