## JAK3 Recombinant Antibody

## RAC00373

| Product Information    |   |
|------------------------|---|
| Size:                  | Protein Background:   |
| 50ul                   | Non-receptor tyrosine kinase involved in various processes such as cell growth,   |
| Reactivity:            | development, or differentiation. Mediates essential signaling events in both innate and adaptive immunity and plays a crucial role in hematopoiesis during T-cells  |
| Human                  | development. In the cytoplasm, plays a pivotal role in signal transduction via its association with type I receptors sharing the common subunit gamma such as IL2R, |
| Source:                | IL4R, IL7R, IL9R, IL15R and IL21R. Following ligand binding to cell surface receptors,  |
| Homo sapiens (Human)   | phosphorylates specific tyrosine residues on the cytoplasmic tails of the receptor, creating docking sites for STATs proteins.                                      |
| lsotype:               | Gene ID:  |
| Rabbit IgG             | JAK3  |
| Applications:          | Uniprot   |
| ELISA, IHC             | P52333  |
| Recommended dilutions: | Synonyms:   |
| IHC:1:50-1:200         | Tyrosine-protein kinase JAK3 (EC 2.7.10.2) (Janus kinase 3) (JAK-3) (Leukocyte janus<br>kinase) (L-JAK), JAK3   |
|                        | Immunogen:  |
|                        | A synthesized peptide derived from human JAK3.  |
|                        | Storage:  |

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

IHC image of RACO0373 diluted at 1:100 and staining in paraffinembedded human lung cancer performed on a Leica BondTM system. After dewaxing and hydration, antigen retrieval was mediated by high pressure in a citrate buffer (pH 6.0). Section was blocked with 10% normal goat serum 30min at RT. Then primary antibody (1% BSA) was incubated at 4°C overnight. The primary is detected by a Goat antirabbit IgG polymer labeled by HRP and visualized using 0.05% DAB.
