

Recombinant Protein Technical Manual

Recombinant Mouse IL beta/IL1B Protein

RPES1726

Product Data:

Product SKU: RPES1726

Size: 10µg

Species: Mouse

Expression host: E. coli

Uniprot: P10749

Protein Information:

Molecular Mass: 17.4 kDa

AP Molecular Mass: 16 kDa

Tag:

Bio-activity:

Purity: > 95 % as determined by SDS-PAGE

Endotoxin: < 1.0 EU per µg as determined by the LAL method.

Storage: Lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.

Shipping: This product is provided as lyophilized powder which is shipped with ice packs.

Formulation: Lyophilized from a 0.2 µm filtered solution of 50mM TrisHCl, 50mM NaCl, pH 8.0.

Reconstitution: Please refer to the printed manual for detailed information.

Application:

Synonyms: Interleukin Beta; IL Beta; Il1b

Immunogen Information:

Sequence: Val118-Ser269

Background:

Interleukin (IL) designates two proteins, IL α and IL β , which are the products of distinct genes, but recognize the same cell surface receptors. IL α and IL β are structurally related polypeptides that show approximately 25% homology at the amino acid level. Both proteins are produced by a wide variety of cells in response to stimuli such as those produced by inflammatory agents, infections, or microbial endotoxins. The proteins are synthesized as 31 kDa precursors that are subsequently cleaved into proteins with molecular weights of approximately 17.5 kDa. The specific protease responsible for the processing of IL β , designated interleukin 1 β -converting enzyme (ICE), has been described. Mature human and mouse IL β share approximately 75% amino acid sequence identity and human IL β has been found to be active on murine cell lines.
