

# Recombinant Protein Technical Manual

**Recombinant Mouse Apolipoprotein H/ApoH  
Protein (His Tag)(Active)**  
RPES2156

## Product Data:

**Product SKU:** RPES2156

**Size:** 10µg

**Species:** Mouse

**Expression host:** Human Cells

**Uniprot:** Q01339

## Protein Information:

**Molecular Mass:** 37.7 kDa

**AP Molecular Mass:** 50-62 kDa

**Tag:** C-His

**Bio-activity:**

**Purity:** > 95% as determined by reducing SDS-PAGE.

**Endotoxin:** < 1.0 EU per µg as determined by the LAL method.

**Storage:** Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.

**Shipping:** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation:** Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

**Reconstitution:** Please refer to the printed manual for detailed information.

**Application:**

**Synonyms:** Beta-2-glycoprotein 1; Apoh; B2G1; B2GP1

## Immunogen Information:

**Sequence:** Gly20-Cys345

## Background:

Apolipoprotein H (APOH), also known as Beta-2-glycoprotein 1, is a glycoprotein synthesized by liver cells and it is present in the blood associated with plasma lipoproteins. Its carbohydrate content is approximately 19% of the molecular weight and it is present in the blood associated with plasma lipoproteins. Mature mouse ApoH shares 76% and 42% aa sequence identity with human and rat ApoH, respectively. The activity of APOH appears to involve the binding of agglutinating, inhibits agglutination, and negatively charged compounds by the contact activation of the intrinsic blood coagulation pathway. APOH is found be involved in the activation of lipoprotein lipase in lipid metabolism on several classes of lipoproteins.
