## AssayGenie

## Product Data:

Product SKU: RPES3135
Species: Cynomolgus

Size: $10 \mu \mathrm{~g}$
Expression host: Human Cells

Uniprot: G7PL88

Protein Information:
Molecular Mass: $\quad 40.2$ kDa
AP Molecular Mass: 45-60 kDa
Tag: C-Fc
Bio-activity:
Purity: $\quad>95 \%$ as determined by reducing SDS-PAGE.
Endotoxin: $\quad<1.0 \mathrm{EU}$ per $\mu \mathrm{g}$ as determined by the LAL method.
Storage: Lyophilized protein should be stored at $<-20^{\circ} \mathrm{C}$, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at $4-7^{\circ} \mathrm{C}$ for 2-7 days. Aliquots of reconstituted samples are stable at $<-20^{\circ} \mathrm{C}$ for 3 months.

Shipping: $\quad$ This product is provided as lyophilized powder which is shipped with ice packs.
Formulation: Lyophilized from a $0.2 \mu \mathrm{~m}$ filtered solution of 50 mM Tris, 100 mM Glycine, pH 7.5 .
Reconstitution: Please refer to the printed manual for detailed information.

## Application:

Synonyms:
Cytotoxic T-lymphocyte protein 4; Cytotoxic T-lymphocyte-associated antigen 4; CTLA-4; CD152; CTLA4

Immunogen information:
Sequence: Ala37-Ser160

## Background:

Cytotoxic Tlymphocyte 4(CTLA-4,CD152), is a type I transmembrane $T$ cell inhibitory molecule that is a member of the Ig superfamily. CD28 and CTLA-4, together with their ligands, B7 and B7-2, constitute one of the dominant costimulatory pathways that regulate $T$ and $B$ cell responses. CD28 and CTLA-4 are structurally homologous molecules that are members of the immunoglobulin ( lg ) gene superfamily. CTLA4 transmits an inhibitory signal to T cells, whereas CD28 transmits a stimulatory signal. Intracellular CTLA4 is also found in regulatory T Cells and may play an important role in their functions. Tcell activation through the Tcell receptor and CD28 leads to increased expression of CTLA4.
