

# Mouse RELM g Recombinant Protein

RPPB0925

---

## Product Information    Protein Information

**Product SKU:**

RPPB0925

**Host:**

Escherichia Coli.

**Protein description:**

RELM-gamma Mouse Recombinant is a His -Tagged Fusion Protein having a molecular weight of 11 kDa containing 86 amino acid residues of the RELM-gamma Mouse and 16 additional amino acid residues – HisTag (underlined).

**Appearance:**

Filtered White lyophilized (freeze-dried) powder.

**Synonyms:**

Resistin-like gamma, RELMgamma, RELM-γ, RELM-g.

**Formulation:**

Filtered (0.4μm) and lyophilized from 0.5 mg/ml in 0.05M Acetate buffer pH-4.

**Purity:**

Greater than 95% as determined by SDS-PAGE.

**Solubility:**

It is recommended to add 0.1M Acetate buffer pH4 to prepare a working stock solution of approximately 0.5 mg/ml and let the lyophilized pellet dissolve completely. For conversion into higher pH value, we recommend intensive dilution by relevant buffer to a concentration of 10μg/ml. In higher concentrations the solubility of this antigen is limited. Product is not sterile! Please filter the product by an appropriate sterile filter before using it in the cell culture.

**Stability:**

Store lyophilized protein at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles. Reconstituted protein can be stored at 4°C for a limited period of time; it does not show any change after two weeks at 4°C. The lyophilized protein remains stable until the expiry date when stored at -20°C.
