# Human MIP 5 Recombinant Protein

## **RPPB1230**

| Product Information | Protein Information                                                                                    |
|---------------------|--------------------------------------------------------------------------------------------------------|
| Product SKU:        | Protein description:                                                                                   |
| RPPB1230            | Macrophage Inflammatory Protein-5 Human Recombinant produced in E.Coli is a single, non-               |
|                     | glycosylated, polypeptide chain containing 92 amino acids and having a molecular mass of 10.1 kDa. The |
| Accession:          | MIP5 is purified by proprietary chromatographic techniques.                                            |
| Q16663              |                                                                                                        |
|                     | Appearance:                                                                                            |
| Host:               | Sterile Filtered White lyophilized (freeze-dried) powder.                                              |
| Escherichia Coli.   |                                                                                                        |
|                     | Synonyms:                                                                                              |
|                     | Small inducible cytokine A15 precursor, CCL15, Macrophage inflammatory protein 5, MIP-5, MIP5,         |
|                     | Chemokine CC-2, HCC-2, NCC-3, MIP- 1 delta, Leukotactin-1, LKN-1, Mrp-2b, C-C motif chemokine 15.      |
|                     | Formulation:                                                                                           |
|                     | MIP5 was lyophilized from a concentrated (1mg/ml) solution containing 20mM PBS pH-7.4 and 100mM        |
|                     | NaCl.                                                                                                  |
|                     | Purity:                                                                                                |
|                     | Greater than 97.0% as determined by:(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.                  |
|                     | Solubility:                                                                                            |
|                     | It is recommended to reconstitute the heaphilized MIRE in starile 18MO cm H2O not less than 100ug (ml  |

It is recommended to reconstitute the lyophilized MIP5 in sterile  $18M\Omega$ -cm H2O not less than  $100\mu$ g/ml, which can then be further diluted to other aqueous solutions.

#### Stability:

Lyophilized MIP-5 although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution CCL15 should be stored at 4°C between 2-7 days and for future use below -18°C.For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Please prevent freeze-thaw cycles.

#### **Amino Acid Sequence:**

QFINDAETELMMSKLPLENPVVLNSFHFAADCCTSYISQSIPCSLMKSYFETSSECSKP GVIFLTKKGRQVCAKPSGPGVQDCMKKLKPYSI.

### **Biological Activity:**

Determined by its ability to chemoattract human T-lymphocytes using a concentration range of 1-10 ng/ml corresponding to a Specific Activity of 100,000-1,000,000IU/mg.
