Porcine FSH Recombinant Protein

RPPB1309

Product Information	Protein Information
Product SKU:	Protein description:
RPPB1309	FSH Porcine is a glycoprotein produced from pituitaries of porcine. The FSH is purified by proprietary chromatographic techniques.
Accession:	
P01228	Appearance:
	Sterile Filtered White lyophilized (freeze-dried) powder.
Host:	
Porcine pituitaries.	Synonyms:
	Follitropin, Follicle-stimulating hormone, FSH.
	Formulation:
	The FSH was lyophilized with no additives.
	Solubility:
	It is recommended to reconstitute the lyophilized porcine FSH in sterile 18M-cm H2O not less than 100 µg/ml, which can then be further diluted to other aqueous solutions.

Stability:

Lyophilized porcine FSH although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution FSH-porcine should be stored at 4°C between 2-7 days and for future use below -18°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Please prevent freeze-thaw cycles.
