Norovirus Group-1 Recombinant Protein

RPPB5642

Accession:

Product Information Protein Information

Product SKU: Protein description:

RPPB5642 The Recombinant Norovirus Group-1 Capsid, E.Coli derived, is a positive sense RNA virus with 7.5kb

> nucleotides, encoding a major structural protein VP1 with 50-55kDa and a VP2 protein. The full length of VP1 capsid protein is derived from the group 1 Norwalk virus. The protein is fused to a 6 His tag at N-

Q83884 terminal and purified by chromatography techniques.

Host: **Appearance:**

Escherichia Coli. Sterile Filtered clear solution.

Formulation:

25mM Tris Base and 25mM k2co3.

Purity:

Protein is >90% pure as determined by 12% PAGE (coomassie staining).

Stability:

The Recombinant Norovirus Group-1 although stable at 4°C for 1 week, should be stored below -18°C. Please prevent freeze thaw cycles.
