Dengue Polyvalent ELISA Recombinant Protein

RPPB5684

Host:

Product Information Protein Information

Product SKU: Protein description:

RPPB5684 Polyvalent dengue antigens are 18kDa proteins containing subtype 1,2,3 and 4 and each of them has

> equal amount protein. They are a new group of antigens specifically designed for ELISA assay. All the recombinant peptides are fused with a 6xHis Tag. Polyvalent dengue is purified by proprietary

Escherichia Coli. chromatographic technique.

Appearance:

Sterile filtered colorless solution.

Formulation:

Phosphate buffered saline, pH-7.4 and 0.05%NaN3.

Purity:

Protein is >90% pure as determined by 12% PAGE (coomassie staining).

Stability:

Polyvalent dengue Recombinant although stable at 4°C for 1 week, should be stored below -18°C. Please prevent freeze thaw cycles.
