

Human CD24 Full-Length Bioactive Membrane Protein

HDFP131

Product Information

Product SKU:

HDFP131

Size:

50µg

Molecular Weight:

The human CD24 Protein has a MW of 8.1 kDa

Expression System:

HEK293

Uniprot:

P25063

Target:

CD24

Antibody Information

Background:

A sialoglycoprotein that is expressed on mature granulocytes and B cells and modulates growth and differentiation signals to these cells. The precursor protein is cleaved to a short 32 amino acid mature peptide which is anchored via a glycosyl phosphatidylinositol (GPI) link to the cell surface. This gene was missing from previous genome assemblies, but is properly located on chromosome 6. Non-transcribed pseudogenes have been designated on chromosomes 1, 15, 20, and Y. Alternative splicing results in multiple transcript variants.

Description:

Human CD24 full length protein on exosome

Protein Family:

GPI-anchored protein

Protein Pathways:

Protein kinase binding

Synonyms:

CD24

Storage:

The product should be stored at -80°C. Please do not repeated freeze-thaw cycles.

Usage:

Research use only

Form:

Supplied in 1xPBS (pH 7.4)
