

Zenocutuzumab ELISA Kit

SKU: GXEL00077 | Assay: Quantitative ELISA (Colorimetric)

The Zenocutuzumab ELISA Kit (SKU: GXEL00077) is a high-sensitivity quantitative ELISA for the quantitative measurement of Zenocutuzumab in Plasma, Serum. The assay covers a detection range of 0.31-5 µg/mL with a sensitivity of 0.156 µg/ml and is read colorimetrically at 450 nm.

Background: Zenocutuzumab, an investigational bispecific antibody, has shown early efficacy in an ongoing phase I/II study of patients with tumors harboring NRG1 fusions. The data so far appear particularly promising in NRG1 fusion-positive pancreatic ductal adenocarcinoma, which tends to occur in younger patients.

Specifications

Product Name	Zenocutuzumab ELISA Kit
SKU	GXEL00077
Accession	P04626 & P21860
Alternative Names	MCLA-128, PB4188, R040517, 1969309-56-5
Assay Type	Quantitative
Detection Method	Colorimetric
Sensitivity	0.156 µg/ml
Detection Range	0.31-5 µg/mL
Recovery	80-120%
Sample Types	Plasma, Serum
Storage	2-8°C. See Storage & Stability.
Note	For Research Use Only. Not for diagnostic procedures.

Storage & Stability

The stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 10% prior to the expiration date under appropriate storage condition. Store at 2-8°C on receipt; avoid repeated freeze-thaw cycles.
