Nanodisc Human O51E2-Strep Protein

HDFP1101

Product Information

Product SKU :	HDFP1101	Expression Host:	HEK293		Size:	10µg	
Target:	O51E2	Tag:	C-Flag&Str	тер Тад			
Additional Information							
Conjugate :	Unconjugate	ed Unip	rot ID:	Q9H255			
Molecular Weig	ght: The human	The human full length O51E2-Strep protein has a MW of 35.5 kDa					

Protein Information

Background:	Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal	
	response that triggers the perception of a smell. The olfactory receptor proteins are	
	members of a large family of G-protein-coupled receptors (GPCR) arising from single	
	coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure	
	with many neurotransmitter and hormone receptors and are responsible for the	
	recognition and G protein-mediated transduction of odorant signals. The olfactory	
	receptor gene family is the largest in the genome. The nomenclature assigned to the	
	olfactory receptor genes and proteins for this organism is independent of other	
	organisms. [provided by RefSeq, Jul 2008]	
Synonyms:	HPRAJ, OR51E3P, OR52A2, PSGR	
Protein Description :	Human O51E2-Strep full length protein-synthetic nanodisc	
Formulation:	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH	
	8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please	
	see Certificate of Analysis for specific instructions. Do not use solvents with a pH	
	below 6.5 or those containing high concentrations of divalent metal ions (greater	
	than 5 mM) in subsequent experiments.	
Protein Pathways:	Cancer, Androgen Signaling and Prostate Cancer.	
Protein Families:	GPCR, Transmembrane, Druggable Genome.	
Usage:	Research use only	

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
