Nanodisc Human ICLN-Strep Protein

HDFP1250

Product Information

Product SKU: HDFP1250 Expression Host: HEK293 Size: 10μg

Target: ICLN Tag: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: P54105

Molecular Weight: The human full length ICLN-Strep protein has a MW of 26.2 kDa

Protein Information

Background: This gene encodes a protein that functions in multiple regulatory pathways. The

encoded protein complexes with numerous cytosolic proteins and performs diverse

functions including regulation of small nuclear ribonucleoprotein biosynthesis,

platelet activation and cytoskeletal organization. The protein is also found associated

with the plasma membrane where it functions as a chloride current regulator.

Pseudogenes of this gene are found on chromosomes 1, 4 and 6. Several transcript

variants encoding different isoforms have been found for this gene. [provided by

RefSeq, Jul 2015]

Synonyms: CLCI, CLNS1B, ICIn

Protein Description: Human ICLN-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Ion Channels: Other.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
