Nanodisc Human CXA1-Strep Protein

HDFP1252

Product Information

Product SKU: HDFP1252 Expression Host: HEK293 Size: 10μg

Target: CXA1 **Tag**: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: P17302

Molecular Weight: The human full length CXA1-Strep protein has a MW of 43 kDa

Protein Information

Background: This gene is a member of the connexin gene family. The encoded protein is a

component of gap junctions, which are composed of arrays of intercellular channels

that provide a route for the diffusion of low molecular weight materials from cell to

cell. The encoded protein is the major protein of gap junctions in the heart that are

thought to have a crucial role in the synchronized contraction of the heart and in

embryonic development. A related intronless pseudogene has been mapped to

chromosome 5. Mutations in this gene have been associated with oculodentodigital

dysplasia, autosomal recessive craniometaphyseal dysplasia and heart

malformations. [provided by RefSeq, May 2014]

Synonyms: AVSD3, CMDR, CX43, EKVP, EKVP3, GJAL, HLHS1, HSS, ODDD, PPKCA

Protein Description: Human CXA1-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Ion Channels: Other.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
