Nanodisc Human OR2J2 Protein

HDFP401

Product Information

Product SKU:	HDFP401	Expression Host :	HEK293	Size	e: 10μg	
		Expression nost.				
Target:	OR2J2	Tag:	C-Flag Tag			
Additional Information						
Conjugate :	Unconjugate	ed Unip	orot ID:	O76002		
Molecular Weight: The human full length OR2J2 protein has a MW of 35.2kDa						
	-	<u> </u>				
Protein Informa	tion					
Background:	ground: Olfactory receptors interact with odorant molecules in the nose, to initiate a neurona				nose, to initiate a neuronal	
	response	that triggers the per	rception of a	a smell. The olfa	ctory receptor proteins are	
	members	of a large family of C	G-protein-co	oupled receptors	(GPCR) arising from single	
	coding-e	xon genes. Olfactory	receptors s	hare a 7-transm	embrane domain structure	

Background:	Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal		
	response that triggers the perception of a smell. The olfactory receptor proteins are		
	members of a large family of G-protein-coupled receptors (GPCR) arising from single		
	coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure		
	with many neurotransmitter and hormone receptors and are responsible for the		
	recognition and G protein-mediated transduction of odorant signals. The olfactory		
	receptor gene family is the largest in the genome. The nomenclature assigned to the		
	olfactory receptor genes and proteins for this organism is independent of other		
	organisms. [provided by RefSeq, Jul 2008]		
Synonyms:	OR6-19, OR6-8, OR6.3.8, ORL684, dJ80I19.4, hs6M1-6		
Protein Description :	Human OR2J2 full length protein-synthetic nanodisc		
Formulation:	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH		
	8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please		
	see Certificate of Analysis for specific instructions. Do not use solvents with a pH		
	below 6.5 or those containing high concentrations of divalent metal ions (greater		
	than 5 mM) in subsequent experiments.		
Protein Pathways:	GPCRDB Class A Rhodopsin-like.		
Protein Families:	Transmembrane, Druggable Genome.		
Usage:	Research use only		

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
