Nanodisc Human OR2S2 Protein

HDFP403

Product Information

Product SKU: HDFP403 Expression Host: HEK293 Size: 10μg

Target: OR2S2 **Tag**: C-Flag Tag

Additional Information

Conjugate: Unconjugated Uniprot ID: Q9NQN1

Molecular Weight: The human full length OR2S2 protein has a MW of 35.2kDa

Protein Information

Background: Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal

response that triggers the perception of a smell. The olfactory receptor proteins are

members of a large family of G-protein-coupled receptors (GPCR) arising from single

coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure

with many neurotransmitter and hormone receptors and are responsible for the

recognition and G protein-mediated transduction of odorant signals. The olfactory

receptor gene family is the largest in the genome. The nomenclature assigned to the

olfactory receptor genes and proteins for this organism is independent of other

organisms. This olfactory receptor gene is a segregating pseudogene, where some

individuals have an allele that encodes a functional olfactory receptor, while other

individuals have an allele encoding a protein that is predicted to be non-functional.

[provided by RefSeq, Jul 2015]

Synonyms: OR37A, OST715

Protein Description: Human OR2S2 full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: GPCRDB Class A Rhodopsin-like.

Protein Families: Transmembrane, Druggable Genome.

Usage: Research use only

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing

and thawing). Lyophilized proteins are shipped at ambient temperature.
