|---------------------|---------|-------------------------|------------|--------------|------|
| <b>Product SKU:</b> | HDFP574 | <b>Expression Host:</b> | HEK293     | <b>Size:</b> | 10µg |
| <b>Target:</b>      | CLCC1   | <b>Tag:</b>             | C-Flag Tag |              |      |

## Additional Information

|                          |   |                    |        |
|--------------------------|---|--------------------|--------|
| <b>Conjugate:</b>        | Unconjugated  | <b>Uniprot ID:</b> | Q96S66 |
| <b>Molecular Weight:</b> | The human full length CLCC1 protein has a MW of 62kDa |                    |        |

## Protein Information

**Background:** Seems to act as a chloride ion channel.[UniProtKB/Swiss-Prot Function]

**Synonyms:** MCLC, RP32

**Protein Description:** Human CLCC1 full length protein-synthetic nanodisc

**Formulation:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

**Protein Pathways:** -

**Protein Families:** Ion Channels: Other.

**Usage:** Research use only

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
